Final Exam

Tuesday 16/06/2020, SOD-1-102

Course Description

This course has two primary objectives: First, it provides students with a solid overview of what we know about key topics of global development, such as the trends in poverty around the world, inequality, access to education and healthcare, international migration, world hunger and population growth. Second, it equips students with tools to critically assess statistical claims and analysis about these issues of global development, by providing an introduction to commonly used empirical methods. In other words: how to spot when someone lies with data? Students will have some opportunities to try out these methods themselves in a hands-on way.

Grading

<i>Item</i>	<i>Points</i>
Problem sets (best 6 out of 7)	25%
Final Exam	75%

Problem sets will be due on March 3rd, 9th, 30th, April 20th, 27th, May 11th, and May 25th. They need to be uploaded at 22:00 at the latest on OLAT drop box folder. The content of the problem sets will be discussed in the exercise sessions.

You can work in groups (of up to 4 students) but each student should submit the problem set separately. If you work in group, please mark the names of other group members on your problem set, which will facilitate the grading process.

The final exam will include questions concerning the required readings, the material in the slides, and the materials covered in problem sets.

Class Policies

Please be advised that the use of laptops, smartphones, etc. is not allowed during classes.

Printouts of lecture slides will be distributed in class. Completed slides will be posted online the day after the lecture.

Schedule and Topics (preliminary, subject to changes)

Week	#	Date	Lectures
1	1	18/02	Course Introduction
1	2	19/02	Global Poverty Measures I
3	3	03/03	Global Poverty II & Inequality I

13	13	19/05	Migration
14	14	26/05	Review Class

Reading List

In order to keep the course up-to-date, the reading list might be updated slightly throughout the semester based on the experience of the early classes and class interests. Changes to readings will come at the latest one week before the lecture they pertain to.

The required readings are in bold. It is recommended to read them before the class and they will be part of the materials covered in the exam. The other readings are optional for those who are interested in further learning.

At the beginning of the reading list there are also a few books for further reading that might be of interest to some of you and are very related to the course content.
